

JONATHAN VAN DIERMEN

Who am I?

My name is Jonathan van Diermen and I am 24 years old. I am currently in the final year of the master Human-Computer Interaction at Utrecht University. In my spare time I like to simplify my life with technology and I like to work on my own made products. I am looking for a new challenge for my master thesis where my passion for design and technology can come together.

Work experiences

- **November 2023 – Current**
MediaMarkt Utrecht
ICT-Specialist smartbar
- **June 2022 – January 2024**
Next Venue
Audio Visual Technician
- **June 2021 – December 2022**
Samsung Benelux
Promotor

Internship

- **November 2024 – April 2024**
TrainTool
UX researcher
As a UX researcher, I investigated how we can create and implement a learning environment within TrainTool using gamification in which students not only learn effectively, but also remain motivated and involved. I used the three pillars of the Self-Determination Theory: autonomy, competence and relatedness.

Volunteer work

- **September 2020 – July 2022**
Unitas S.R.
Vice-preses App committee
In a group of 6 people we developed a new app for the student association Unitas S.R. with more than 1000 active members in 2 years time. As Vice-preses I was the right hand of the Preses. In addition I was also head programmer and made the decisions at the front-end.
- **April 2023 – August 2024**
Christengemeente Sefanja
Youth Work Coordinator
As a youth work coordinator I was responsible for devising and organising activities for teenagers. I created programmes that stimulated both social and personal growth and supported a team of 25 volunteers in their tasks. My role required strong communication skills, leadership and a creative eye for creating engaging and meaningful programmes.
